

VCBM 2018

8th EUROGRAPHICS Workshop on
VISUAL COMPUTING FOR BIOLOGY AND MEDICINE

Granada, 20-21 september 2018

Granada (Spain)

8th EG Workshop on Visual Computing for Biology and Medicine

vcbm.org

20-21 September 2018, the annual Eurographics Workshop on Visual Computing for Biology and Medicine (EG VCBM) will take place in the UNESCO World Heritage city of Granada, co-located with the 21st International Conference on Medical Image Computing and Computer Assisted Intervention (MICCAI).

EG VCBM, the Eurographics Workshop on Visual Computing for Biology and Medicine, is an annual event addressing the state of the art in visual computing research with a strong focus on applications in biology and medicine. It provides an interdisciplinary forum for experts (researchers and practitioners) from visualization, visual analytics, computer graphics, image processing, computer vision, human computer interfaces as well as experts from biology and medicine, jointly working on next generation visual computing solutions for medicine, healthcare and the biotechnology sector. This year's workshop is already the 8th VCBM since its foundation in 2008.

EG VCBM solicits the submission of original, application-oriented research papers that advance the fusion of visual computing methods within medicine and biology. All papers (regular papers as well as short papers) should focus on a well-defined biological/medical problem, and demonstrate a significant innovation or improvement in visual computing.

Submission Deadline: 22nd June , 2018 – vcbm.org
